COTONEASTER PRAECOX

This is one of the hardestiest Cotoneasters and went through 20 degrees below zero without any harm. It has large berries like cranberries which color up in the middle of August and remain on until very late Fall. It grows rather flat and makes an ideal plant to mix in with foundation plantings and especially with ranch-type houses. It also makes an ideal low spreading hedge.

* - * - EXOCHORDA WILSONI

This plant was introduced into this country by the famous Dr. Wilson. It is a big improvement over *Exochorda grandiflora* as it blooms much heavier and the flowers are exceedingly fragrant.
